EXPERIENCE

CMS Computers | Full-stack Engineer | Hybrid

Dec 2024 - PRESENT

CMS is a service-based company specializing in government projects.

- Designed and built secure **REST APIs with RBAC**, integrated **payment gateways,** and connected **5+ third-party APIs** for **Datalake 3.0 (NHAI)**, supporting large-scale government data systems using **Node.js / Python (FastAPI)**.
- Designed and developed **scalable REST APIs using Node.js** for a nationwide **site inspection system**, supporting inspection workflows and field operations across India with Node.js.
- Built a **chatbot** using offline models with **LangChain** and **Python / FastAPI**, trained on government documents and protocols to help users perform operations smoothly.
- Built a cross-platform **mobile app (iOS and Android)** for field inspections with **online/offline** functionality using **React Native, Node.js and RTK Query**.
- Built an adaptive **image upload system** on **AWS S3** with multi-resolution compression, ensuring smooth media delivery across different network conditions.
- **Tech-stack - JavaScript(Node.js, React Native, TypeScript), Python (Fast API), LangChain, Tailwind, AWS (Lambda, S3), PostgreSQL, Redis, Docker.**

The Techtonic | Jr. Full-stack Developer | On-Site

Jan 2024 - Dec 2024

Techtonic is an Early-stage startup managing products and orders for multiple E-commerce clients.

- Developed an **AI-powered Operations Assistant** using **Python / FastAPI, React.js, and OpenAI model** for **natural-language queries** across pricing, product, warehouse, and support data.
- Built a responsive frontend for an ONDC buyer e-commerce app using React and **TanStack Query**, with **webhook** integrations and **Razorpay** payment support.
- Worked on Node.js and NestJS for authentication, authorization, payment, along with API design and database modeling.
- Reduced processing and sync times by **30%** through **Async Queuing**, optimized API consumption, and **PostgreSQL**-level optimizations.
- **Tech stack - JavaScript, Python, FastAPI, React.js, Node.js, TypeScript, Tailwind, MySql, PostgreSQL**

SKILLS

Languages: Python, JavaScript, TypeScript
Back-end: Node.js, Express.js, FastAPI
Front-end: React.js, Next.js, Redux, Tailwind
Mobile: React-Native, Android Studio, XCode
Databases: PostgreSQL, MySQL, Redis, Firebase
AI/GenAI: LLMs, RAG, Agentic AI, AI Chatbots, LangChain
Misc: Web Scraping, Agile, Debugging, Testing, Data Structures, Algorithms, Automation, Git

Essence Web Technology | Web Developer | On-Site

Feb 2023 - Jan 2024

Essence WT is a newly founded startup.

- Built a **full-stack CRM** using **Node.js and React.js** to streamline client data and workflows.
- Created a **Python-based scraping** pipeline to collect **3,000+** packers and movers records across India..
- Designed and delivered **30+** static websites for local businesses using HTML, CSS, Bootstrap, and Tailwind.
- **Tech Stack: JavaScript(React.js, Node.js), MongoDB, Python, HTML, CSS**

INTERNSHIP AND CERTIFICATES

- **Industry training in Data Science** (View)
  Jan 2024 - Dec 2024 (Sabudh Foundation)
  Project - Document Analysis using Large Language Models (LLM's)
- **Training in Python Full Stack Development**
  August 2022 - February 2024 (JSpiders)

EDUCATION

Techno Main Saltlake, Kolkata

July 2018 - June 2022
